How the Rank Board works: Every advisor is ranked 1–21 on each of the 9 metrics above. Ties share the average of their rank positions. The *Rank Score* is the sum of all metric rank points — maximum possible is **189**. Each *Sunbit* application adds a flat +1 to that total, then a CSI recognition pass applies a +10% multiplier on top of everything (so CSI also boosts your Sunbit contribution). Green values = top 20% for that metric; red = bottom 30%. 🥇 indicates a tie for first place on that metric.

Tie-breakers (in order, when two advisors have the same Rank Score): 1) CSI pass beats no CSI · 2) more total hours (CP + Warr) · 3) fewer open ROs · 4) more service units (Align + Tires + Valv).
